Community Numeracy Evening

How can I help my child with Maths?

When: 18 June, 2014
Time: 6.30 pm
Where: Kurunjang Secondary College

We have many parents who ask “How can I help my child with Maths?”

The basics of Maths haven’t changed! You use your maths skills every
day from grocery shopping, checking the size of a car park space to
estimating how long travel time is to a destination. You have the skills to
help your child!!

We are inviting you to join us for a Community Numeracy Evening at
Kurunjang College. Come along and find out what happens in Year 7-10
Numeracy classes. Numeracy staff will be present to provide support and
share common sense strategies you can use to help your child with Maths.

Parents and Students all welcome
