

Novel coronavirus (2019-nCoV)

Factsheet for schools and early learning centres

Last updated 2 February 2020

An outbreak of novel coronavirus (2019-nCoV) was detected in Wuhan, China in late December 2019. Cases have been reported predominantly in mainland China, as well as some other countries, including confirmed cases in Victoria, Australia.

What is this virus?

Coronaviruses can make humans and animals sick. Some coronaviruses can cause illness similar to the common cold and others can cause more serious diseases, including Severe Acute Respiratory Syndrome (SARS) and Middle East Respiratory Syndrome (MERS).

The virus seen in mainland China is called 'novel' because it is new. It has not been detected before this outbreak. Most people infected live in, or travelled to, mainland China. It is likely that the virus originally came from an animal, and there is now evidence that it can spread from person-to-person.

What are the symptoms?

Symptoms can include fever, cough, sore throat, or shortness of breath. Symptoms can take up to 14 days to develop.

What if I have a student or staff member who has been to mainland China in the past 14 days?

The following staff and students should self-isolate and are advised to stay at home and avoid public settings, including attendance at schools and early learning centres:

- People who were in Hubei Province until 14 days after they were last in Hubei Province;
- People who were in mainland China on or after 1 February 2020 until 14 days after they were last in mainland China;
- Close contacts of confirmed cases until 14 days after last close contact with the confirmed case.

Children and staff who are well and have travelled to any other countries where there have been reported cases, are NOT recommended to be excluded from schools and child care services unless the following applies:

- The person is a confirmed case of novel coronavirus
- The person is a close contact with a confirmed case of novel coronavirus in the past 14 days

If you think a child, student or staff member may meet one of the above criteria please call the Department of Health and Human Services (DHHS) to discuss further actions on 1300 651 160.

How can we help prevent the spread of 2019-nCoV?

Practising good hand and sneeze/cough hygiene is the best defence.

Encourage all students and staff to:

- wash hands often with soap and water
- cough and sneeze into your elbow
